

## CLAIMS

I claim:

1. A free standing firepit comprising, in combination:

a) a base support member to maintain the firepit in an upright position;

b) a generally funnel shaped base element containing a bottom grate adapted to hold fuel;

c) a meshed screen disposed on the peripheral portion of said base element to fully enclose said base element to form a interior space for combustion of fuel; said mesh screen having an access opening to provide user access to said firepit enclosure;

d) a moveable door for covering said access opening;

e) a middle grate having a cooking grill surface removably mounted in said firepit enclosure; said grate being mounting adjacent and contiguous to said access opening of said mesh screen to pivot about an access of rotation adjacent and contiguous to said access opening.

2. The firepit of Claim 1 and further comprising an ash receptacle containing a removable drawer for cleaning ashes therefrom;

3. The firepit of Claim 1 and further comprising a base element open at both ends;

4. The firepit of Claim 1 and further comprising a bottom grate, adapted to hold fuel;

5. The firepit of Claim 1 and further comprising apertures in the bottom grate to permit the spent ashes to fall therethrough;

6. The firepit of Claim 1 and further comprising a base support member fully enclosed about its periphery with a screen;

7. The firepit of Claim 1 and further comprising an access door on the screen to provide access to the firepit enclosure;

8. The firepit of Claim 1 and further comprising a middle grate having a cooking grill surface;

9. The firepit of Claim 1 and further comprising a post comprised of a collar for receiving a complimentary pin;
